Progressive Software Solutions & Training

## PROJECTS

### Face Recognition Attendance System

Jul 2025 - Aug 2025

A Python-Django based system that uses face recognition to automatically mark student attendance. The system detects and identifies student faces using computer vision and records attendance accurately without manual entry.

### Detex AI

Dec 2024 - Feb 2025

Developed an AI-powered trash detection system using YOLOv8 for aquatic and land waste identification. Built with Django, Java, and SQLite featuring image uploads and real-time detection with a dynamic front-end

### AI-AssistCart

Jan 2024 - Mar 2024

Developed an AI-based online shopping cart using Django, integrating TF-IDF for personalized recommendations. Built the front-end with HTML, CSS, and Bootstrap, and used Django with AJAX for dynamic updates

## VOLUNTEER EXPERIENCE

### National Service Scheme

Aug 2022 - Mar 2025

Cause: Social Services

#### Role: NSS Volunteer

Organized and participated in community service events promoting health, education, and environmental awareness, enhancing leadership and communication skills.
